

# Maximize the life and performance of your equipment

Infor EAM is a 21st-century best-in-class enterprise asset management solution that helps improve asset performance. With rich built-in functionality and industry-specific editions, Infor EAM uses predictive and preventive technologies along with 25+ years of expertise to extend asset life and increase efficiency. Accessible on any mobile device; deployable in the cloud, on premise, or as a hybrid; and built on modern architecture, Infor EAM can scale as needed, enhancing your ability to grow.

# Manage your assets efficiently

EAM software is essential for managing asset performance and maximizing resources, but this crucial component of a company's IT infrastructure requires long-term considerations.

"Infor EAM is at the core of our strategy. We have reduced our parts expense on average by 3-4% each year since we started using Infor EAM over 10 years ago, and we are continually finding ways to keep that up, most recently by leveraging Infor EAM Mobile to change the way work gets done on our shop floors."

- Todd Hawkins, SVP Maintenance, First Transit, Inc

# EAM solution provides:

Advanced scheduling capabilities

A system-wide view that allows your company to meet changing demands without impacting

production schedules.

# *Maintenance optimization*

A system that includes capabilities for determining the right mix of failure-based maintenance (run to fail), use-based maintenance, preventive maintenance, and condition-based maintenance.

Health, safety, and environmental safeguards
Features such as lockout/tagout, safety
checklists, safety priority field, and material
safety data sheets.

4.

# Analytical tools

Highly sophisticated role-based dashboards that enable you to easily make better business decisions.

# Infor EAM – Enterprise Grade Asset Management

Infor EAM is a complete product offering that enables businesses to manage all asset management challengesinvolving not just the management of assets, but also asset strategies, sustainability, and the business processes needed to support these challenges.

# **Experience the Core Benefits of EAM**

#### Predict and prevent equipment failure

Preventative maintenance plans extend the life of your assets and lower costs. Infor EAM prevents equipment failure, flagging equipment to be checked based on statistical exceptions, and tracking conditions for each maintenance task. Schedule tasks to avoid equipment failures and increase productivity.

#### Energy saving

Achieve significant energy savings at your facility and deliver long-term sustainability of your equipment. Building managers and owners can create smart buildings by better managing and monitoring assets.

#### *Track labor & compliance*

Easily track labor costs. Avoid resource shortages, overutilization and eliminate unnecessary labor costs. Ensure compliance with ISO 9000, OSHA, Joint Commission, HAZMAT, employee training, and workforce development requirements.

# Streamline purchasing & procurement

Automatically generate requisitions, calculate purchase order costs, and efficiently order parts and supplies. Purchase items at volume discounts-all with a simple click-with Infor EAM iProcure, an integrated procurement network

#### Lower facility management costs

Track important asset details. Plus, create service contract records for equipment under warranty. Infor facilities management system can lead to lower operating costs and improved sustainability with a lower carbon footprint.

#### TPM and OEE

Infor EAM can lay the foundation for fewer breakdowns, stops and defects and can be integral part of your total productive maintenance (TPM) plan and your overall equipment effectiveness (OEE).

#### *Reduce unscheduled downtime*

Create and manage work order assignments easily, schedule tasks to avoid equipment failures and help reduce unscheduled downtime.

# Streamline inventory management

Check out, return, adjust, and move inventory items so that less money is tied up in unused assets, and necessary parts are always available.
