

Infor CloudSuite Industrial (SyteLine)

Improve Productivity

What if instead of racing against the clock, you could deliver on time, every time? With fierce competition, you must be able to get to market quickly and do a better job matching up supply with demand. No matter how complex your supply chain, you must respond faster to change, reduce excess inventory, and cut costs. Even more importantly, your customers expect what you promised, when you promised it. You can deliver all this and more with an ERP solution that helps you improve productivity—both in the office and on the shop floor. Infor CloudSuite™ Industrial (SyteLine®) is that solution.

With Infor CloudSuite Industrial, you can make your system your own and enjoy all the tools and support you need to be successful.

Get experience built in

Developed by experts in manufacturing, Infor CloudSuite Industrial (SyteLine) has more than 25 years of experience built in. You can be confident you've got the tools you need to get the job done, and that you're getting it all from an experienced support team. With Infor CloudSuite Industrial, you can define your own business processes to make the system your own instead of letting it dictate those processes to you. You'll find it easier to deal with daily disruptions from employees, equipment, and suppliers thanks to the manufacturing best practices and process flows that are embedded within Infor CloudSuite Industrial.

With Infor CloudSuite you get:

1. *Reliability and guaranteed performance*
Built on highly flexible, scalable architecture, the software allows manufacturers to be agile and in-sync with the fast-changing expectations of customers.

2. *No need to buy hardware*
Concentrate on your business instead of technical details. When you run CloudSuite Industrial as an Infor cloud computing solution, your account will be hosted on datacenters that are maintained and optimized by certified experts.

3. *Security*
Survive and keep operating in any worst-case scenario with the help of full redundancy and world-class disaster recovery systems. Plus, get the latest and most powerful defenses against intrusion, hacking, and unauthorized access.

4. *Unlimited, instantaneous growth potential*
Get your business software solution to your expanded facilities and new locations ahead of you — with as many seats and sites as you need — anytime, anywhere.

Operate more efficiently

Whether you are a mid-size manufacturer with mixed mode processes or an enterprise-size OEM with a complex MTO and ETO business model, Infor CloudSuite Industrial can help you operate more efficiently.

Experience industry-specific functionality With Infor CloudSuite Industrial, you get:

Advanced planning and scheduling (APS)

Find out if you have the materials, people, machines, and tools you need to manufacture an item. And continually monitor demand as it occurs. Before you commit to an unplanned order, see the ripple effect it will have on your schedule and your shop floor, so you can reset expectations with existing customers. If a machine goes down, you can update production schedules quickly. In the process, you'll boost productivity, improve order accuracy, increase on-time delivery-and keep your customers happy.

Materials and inventory management

Would you like to reduce your inventory while avoiding shortages? With Infor CloudSuite Industrial, you can buy what you need, when you need it. You can also do away with side systems, which are difficult and costly to maintain. Plus you can shorten order entry time, eliminate duplicate orders, cut down on costly data entry errors, and make sure data is consistent-leaving you with more time to grow your business.

Customer management

Manage all aspects of your relationships with customers and prospects, from estimating to invoicing.

Application event system

Customize your system without modifying your source code, and improve your workflow in the process. When you upgrade your system, you'll automatically upgrade your customizations at the same time.

Microsoft®-based system

With familiar tools and common navigation, you'll save time on implementation, customization, and training. Plus your IT staff will be able to focus on strategic projects rather than tactical issues. Not only that, you'll be able to draw from a huge talent pool that knows how to work with a Microsoft-based system.

Role-based information

Get all the information you need to do your job in a single screen. For example, if you're a production planner, you'll get data that helps you manage planned vs. actual production, unplanned scrap by reason, resource utilization, and on-time completion.

Better user experiences

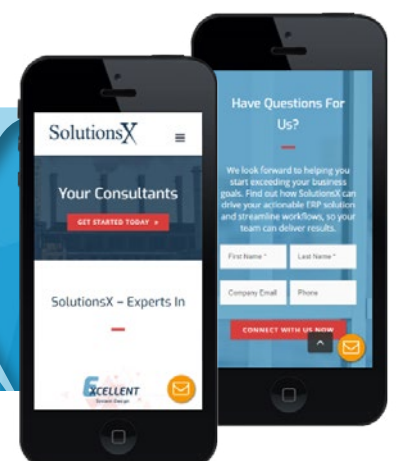

Personalize your user interface (UI) to fit your particular industry, team, or an individual user. Add, remove, and edit fields, labels, and complete screens without having to call on IT for help. Get the information you need, when you need it, with easy-to-use grid forms. Plus, reduce or eliminate costly modifications to personalized features when you upgrade your system.

Easy integration of new companies

If you bought a new business today, could you have it up and running quickly? With Infor CloudSuite industrial, you can add a new company to your organizational structure, replicate your data, and be good to go-while you continue business as usual. Plus, when you sell off an old business, you can easily separate data. And you can go to one place for financial information, since your financial reporting solution is integrated.
