# XtenCSIon Packs

AUTO BANK RECONCILIATION

The bank reconciliation process in Infor CloudSuite Industrial (SyteLine) can be tedious and prone to errors to say the least.

The Auto Bank Reconciliation XtenCSIon Pack streamlines this process saving countless hours of tedious work annually finance professionals to focus on more strategic tasks.

Further, automation of the bank reconciliation process reduces errors and provides more timely financial information required to make decisions in today's fast-paced world.

Simply download the text file from you bank and import it into the Auto Bank Reconciliation application. The software automatically matches up transactions from the bank file to the check register inside Infor CloudSuite Industrial leaving you with only those transactions that require human intervention.

It takes less than 30 minutes to install and configure the Auto Bank Reconciliation XtenCSIon Pack and services are included in your annual subscription. Contact us today for more information.
